WORK EXPERIENCE

Cyber Security Engineer II (Identity Access Management)

CarMax

Richmond, VA

Jun 2025 – Present

- Developed custom SCIM connectors integrating SailPoint IdentityNow with third-party platforms, enabling automated provisioning and bidirectional identity data exchange across internal applications.
- Led architectural planning of the internal IAM application, including a new front-end experience, enhanced security posture, expanded functionality, and deep SailPoint integration.
- Implemented 15+ enterprise SSO integrations using SAML and OpenID Connect (OAuth 2.0) via PingFederate, improving authentication security and end-user experience.

Full Stack Developer (Contract)

Scope Labs

Remote

Jan 2025 – May 2025

- Led 10+ end-to-end full-stack initiatives from design through backend integration, delivering production-ready solutions independently.
- Contributed to two major client projects with distinct stacks, including Firebase/Flask/React and PostgreSQL/FastAPI/Next.js, built primarily with Python and TypeScript.
- Led implementation of a sponsored posts and SEO initiative on an established web application, driving increased platform revenue and organic user growth.
- Served as the sole developer for a B2B analytics dashboard, delivering insights across 30+ business metrics, including time-series analysis to support decision-making for the client.

Full Stack Developer (Contract)

Resonite LLC

Remote

Oct 2023 – Aug 2024

- Designed and delivered 5+ client websites using React with Typescript, Nextjs, Tailwind, Figma, and Vercel.
- Partnered directly with clients to define SOWs, set timelines, gather requirements, and drive delivery.
- Built a Golang-based API layer supporting shipping logistics and dispatch workflows at scale.

Data Analyst Intern

AstraZeneca Pharmaceuticals

Wilmington, DE

Jun 2023 – Sep 2023

- Built a Python and Pandas based data cleaning and automation pipeline to generate quarterly reports, reducing manual data collection and cleaning by 200+ hours annually.
- Engineered four interactive Power BI dashboards using the Salesforce API and DAX, visualizing key KPIs and supporting 30+ active business users.

Data Analyst Intern

Virginia State Board of Elections

Richmond, VA

Jun 2022 – Sep 2022

- Automated daily project reporting by building Excel macros and SQL queries, reducing manual data processing by ~2 hours per day.
- Coordinated with 50+ localities to investigate and resolve population data discrepancies within ArcGIS.

EDUCATION

University of Virginia

BS in Computer Science; Minor in Data Science

Cumulative GPA: 3.6/4.0;

Charlottesville, VA

December 2023

PROJECTS

MBX Technologies

May 2025 - Current

- Co-founded a software consulting firm, generating \$50K+ in revenue and 5 client engagements within the first 6 months, delivering full-stack and backend systems for fintech startups and healthcare practices.
- Led system architecture and technical delivery across client projects, spanning Next.js, FastAPI, Supabase, PostgreSQL, and cloud deployment, with a focus on security, scalability, and performance.

Statistex

October 2024 - February 2025

- Developed an analytics dashboard SAAS with the goal of improving performance and consistency in players. Project built using FastAPI/Nextjs/Postgresql.
- Designed a Valkey-based fingerprinting algorithm (open-source Redis) to deduplicate events prior to persistence, removing database-level uniqueness constraints and improving p99 write latency.
- Demo video for frontend of MVP: (<https://www.youtube.com/watch?app=desktop&v=RuPoUb40RyA>)

State of the Art in Recommendation Systems

Jan 2023 - December 2023

- Researched and synthesized machine learning methods for social media recommendation systems for my senior thesis at the University of Virginia. (<https://doi.org/10.18130/bem4-3v72>)

Personal Portfolio Website

June 2024

- Utilized Nextjs, Threejs, Framer Motion, Figma, and Vercel to design and create <https://BrendanKeaton.com>.

Experience in Python, Javascript, Typescript, HTML/CSS, Relational Databases, Machine Learning, Figma, React, Next.js, Vercel, Framer, SQL, Golang, FastAPI, Flask, Firebase, Supabase, Postgresql, R, Power BI, Pandas, Data Visualization, Data Scraping, Jira, Notion, Linear, PingFederate, Sailpoint, Powershell, Azure, RESTful APIs, Webhook Integrations, Rust, Valkey, Redis, TailwindCSS, Docker, ArcGIS, SAML/Oauth/SCIM, and Git/Github.
